1 Section

1.1 Subsection

Definition 1.1.1

This is a **definition**.

Lemma 1.1.2

This is a lemma.

$$a+b=c. (1.1.1)$$

Note. This is a note.

Theorem 1.1.3: Theorem

This is a named theorem.

$$c = a + b. (1.1.2)$$

Proof. Left as an exercise.

Example 1.1.4. This is an example: a = 1, b = 2, and c = 3.

Corollary 1.1.5

This is a corollary.

$$c - b = a. (1.1.3)$$

Proof. Subtracting b from both sides of (1.1.2), we have

$$c - b = a + b - b$$
$$= a. \tag{1.1.4}$$

1.2 Another subsection

Theorem 1.2.1: Another

This is another theorem.

Remark. This is a remark.

2 Another section

2.1 Subsection of another section

Lemma 2.1.1

This is another lemma.
